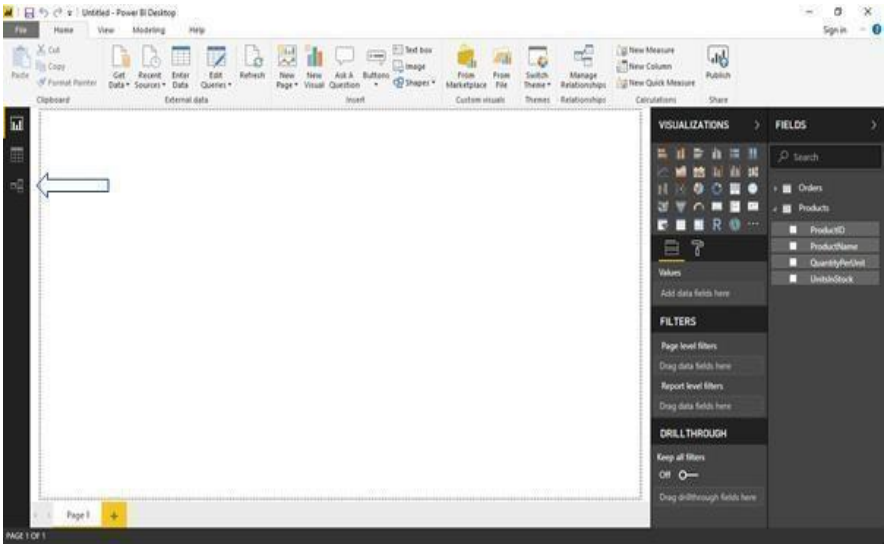
Ex.No: 3	Data Visualization from ETL Process
Date:	

AIM:

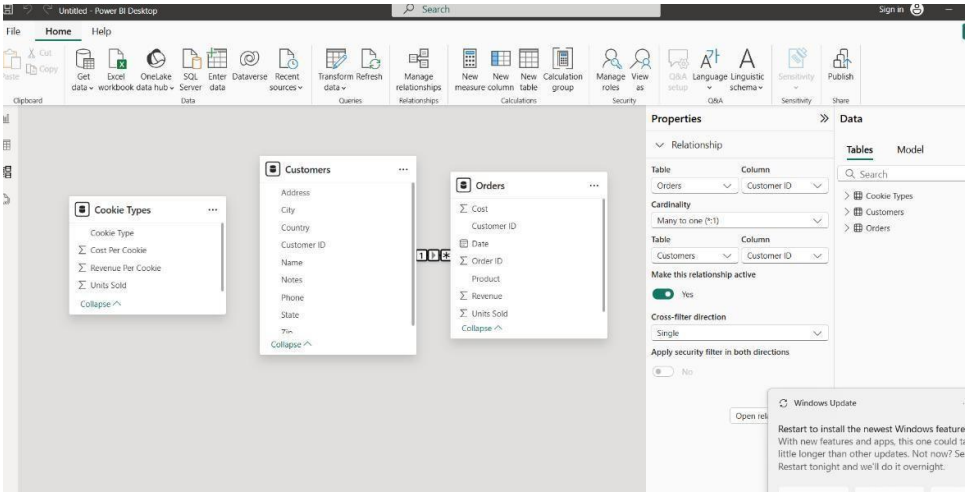
To perform the Extraction Transformation and Loading (ETL) process to construct the database in the SQL Server / Power BI.

PROCEDURE:

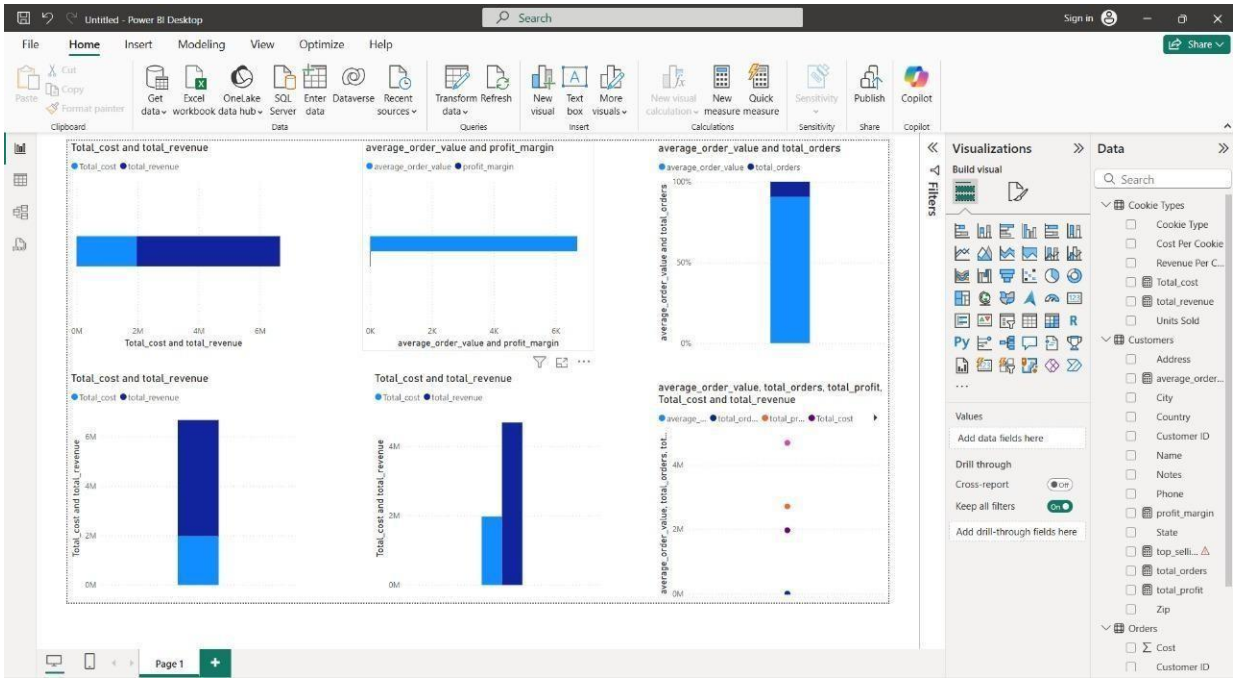
Step 1: Once the data is loaded, select the Model view and create relationship.

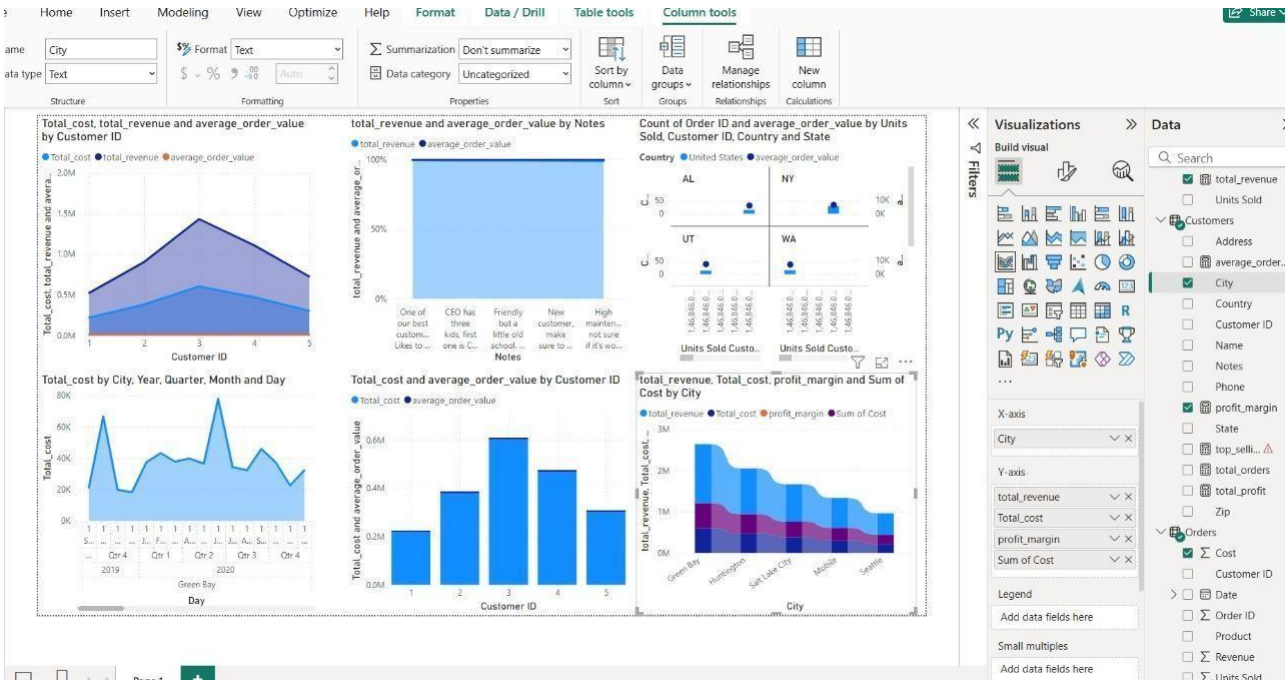


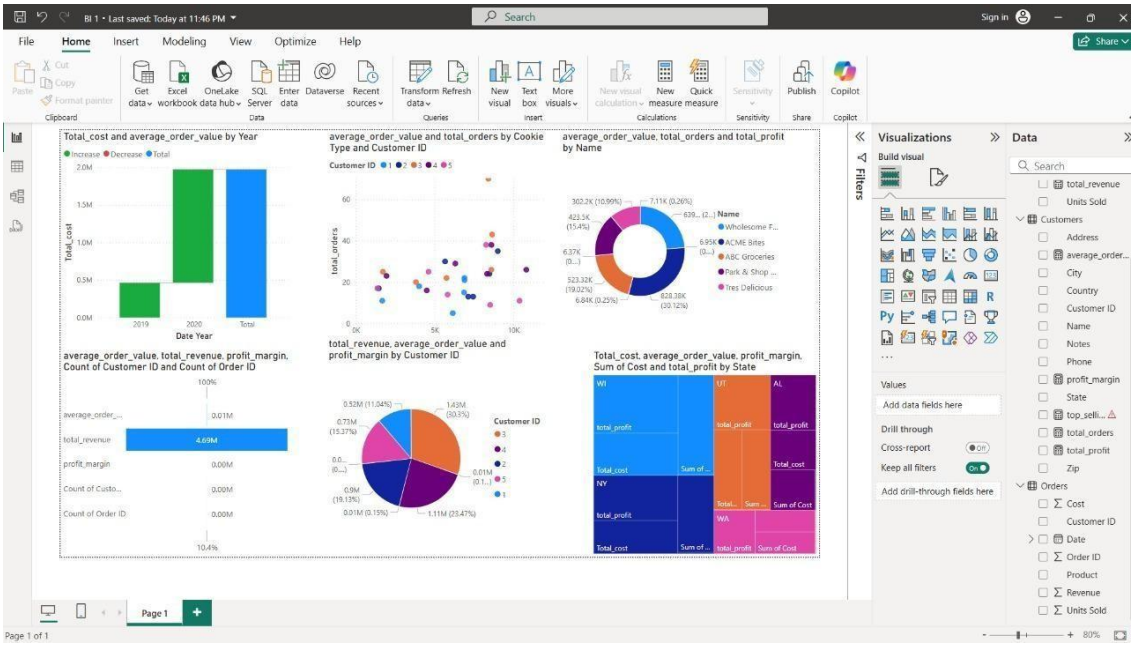
Step 2: We see the following, which visualizes the relationship between the queries.



Step 3: After managing the relationships, create a dashboard using all graph visuals.







BI 1 • Last saved: Today at 11:46 PM
